

1. **pandas** - Data manipulation and cleaning
2. **numpy** - Numerical operations and NaN handling
3. **scikit-learn** - Machine learning modeling
4. **LinearRegression** - Baseline model
5. **RandomForestRegressor** - Comparison model
6. **OneHotEncoder** - Categorical feature encoding
7. **ColumnTransformer** - Feature preprocessing pipeline
8. **Pipeline** - Model workflow orchestration
9. **datetime** - Date parsing and handling
